

Village of Kaslo

British Columbia

MEDIA RELEASE

For immediate release
February 1, 2019

The Village of Kaslo is pleased to announce that it has awarded the tender for the 'Sanitary Sewer System Expansion Phase 1' to Brenton Industries Ltd. of Kaslo, B.C.

In 2012, the Village began development of a Liquid Waste Management Plan (LWMP). One of the recommendations arising from this work is to expand the sanitary sewer service within the lower Kaslo area. Phase One of this proposed sewer system expansion will provide service to approximately 60 parcels in and adjacent to the downtown commercial area.

The Village applied for funding through the Union of BC Municipalities Strategic Priorities fund and was awarded \$910,000 for this project, which will fund contract costs, engineering, and project-related costs to the Village.

This is great news for the residents of Kaslo. We anticipate starting construction in March 2019, with an anticipated construction timeline of approximately four months.
